

Tour Booking System

Features

Booking Agents

The NetBookings Tour Booking System allows booking agents to login, view the tour calendar, make a booking and pay by credit card or on account.

They can also make changes to their bookings at any time up until your terms and conditions allow (eg. 48hrs before departure)

Booking agents are supported by allowing them to find their clients with the system so they do not have to re enter returning diver details, this is a great time saver they love.

All commissions are tracked and can be reported on daily, weekly, monthly or across any period you want.

Facebook Posting

When a tour is scheduled it can be automatically posted on your Facebook wall. Simply by ticking 'Post on Facebook', your tour will be posted on the wall of your page with the Date and time, a photo and description and a link to Book Now.

A great time saver and keeps you in touch with your clients.

Facebook has become the no 1 visited web site in the world and NetBookings makes it easy for you interact with.

iPhone, iPad & Smart Phones

NetBookings is fully compatible with the iPhone, iPad and Smart Phones.

Our secure server and technology is fully tested on these devices and your clients can book online and receive instant confirmations.

The tour calendar can be viewed and bookings made with ease!

YouTube

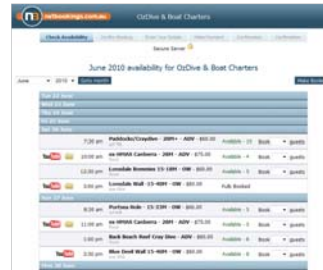

Videos on YouTube can easily be linked on the calendar for people to watch before making a booking.

Video is the best way to show people where they are going and what to expect. It only takes a minute to link your video to a tour.
